I, **SANKET BIJJA** SEEKING A PLACE FOR A **POST OF JUNIOR ARCHITET** TO MAXIMISE MY KNOWLEDGE, SKILLS AND ABILITIES IN ALL ASPECTS. I WOULD LIKE TO TAKE THIS OPPORTUNITY AS A PLATFORM TO SHOWCASE MY **CREATIVITY IN DESIGN, COMMUNICATION, TEAMWORK** AND **LEADERSHIP** SKILLS. OPEN ENVIRONMENT AND STAY CLOSE TO NATURE INSPIRES AND MOTIVATES ME. IT GIVES ME IMMENSE PLEASURE TO WORK WITH UTMOST PROFESSIONALISM. **ACCURACY AND TIME CONCIOUSNESS** ARE MY KEY FACTORS. I HEREBY ENSURE TO MAKE SIGNIFICANT CONTRIBUTION T YOUR FIRM WITH MY **DEDICATION AND DETRMINATION**.

EDUCATION

- 2023** ● BACHELOR OF ARCHITECTURE
S.E.S. College of Architecture,
Solapur.
- 2017** ● HIGHER SECONDARY EDUCATION
D.B.F. Dayanand College of Arts &
Science, Solapur.
- 2015** ● SECONDARY EDUCATION
Haribhai Devkaran High School
and
Junior College, Solapur.

DAY CARE AND PRE-SCHOOL

PROJECT TYPE : DAY CARE AND PRE SCHOOL

YEAR : 2019 SEMESTER: 3

SITE LOCATION : IT PARK, HINJEWADI, PUNE.

SITE AREA : 1815.25 SQM

TOTAL FLOORS : 3

GROUND COVERAGE : 865 SQM

BRIEF

A REPUTED PRIVATE SCHOOL IN CITY OF PUNE WANTS TO START ITS NEW BRANCH OF PRE-SCHOOL DAY CARE CENTRE IN THE HEART OF IT PARK AT HINJEWADI. THE SITE IS EXACTLY OPPOSITE TO THE IT GIANT INFOSYS CAMPUS.

THE INTENSION OF THE SCHOOL & THE DAY CARE IS TO PROVIDE A HEALTHY FRIENDLY ENVIRONMENT CONSCIOUS CAMPUS TO THE KIDS OF IT EMPLOYEES WHO STAY AWAY FROM EACH OTHER FOR MOST OF THE DAY TIME.

THE MAIN REASON OF THE SITE SELECTION IS TO MAINTAIN THE PROXIMITY BETWEEN PARENTS & WARDS IN CASE OF EMERGENCY.

CONCEPT

THE DESIGN WE NEED TO CREATE IS SUCH A SPACE OCCUPANTS FEEL THEMSELVES RELAXED AND REFRESHED. KEEPING THIS IN MIND THOUGHT CURVED LINES IN ELEVATION AS MY CONCEPT. THERE IS CONNECTIVITY OF INDOOR & OUTDOOR SPACE IN SUCH WAY THAT YOU FEEL CONNECTED TO NATURE.

SHELTER AS THE MAIN FEATURE

SOLAPUR ART ACADEMY

PROJECT TYPE : EDUCATIONAL INSTITUTE

YEAR : 2021 SEMESTER: 6

SITE LOCATION : SOLAPUR

SITE AREA : 12,276 SQM

TOTAL FLOORS : 1

GROUND COVERAGE : 4,135.30 SQM

BRIEF

THE MINISTRY OF CULTURE (GOVERNMENT OF MAHARASHTRAY HAS AN IDEA OF SETTING UP CENTERS FOR PROMOTING LOCAL ART OTHERWISE TO ENCOURAGE ACCESS TO ARTS IN TOWNS AND CITIES. IT IS UNDER SUCH AN INITIATIVE THAT IT WANTS TO START AN URBAN ART CENTER WHERE ARTISTS OR LOCAL PEOPLE CAN ACCESS THE PLACE TO PERFORM TEACH AND EXHIBIT. SUCH CENTER ALSO NEED TO INTEND TO ACT WITH RESPECT TO ACCESSIBLE TO ALL AND NOT TO BE RESTRICTIVE. EVERYONE SHOULD EASILY ACCESS THESE SPACES AT ALL THE TIMES ADDING ALL TO PARTICIPATION FOR ENHANCEMENT OF THE URBAN SPACES OF SOLAPUR.

CONCEPT

THE CONCEPT THOUGHT IS RELATED TO EVERYONE EVERY RELIGION, EVERY CULTURE, SO NATURE IS ONE AMONG THEM. BASED ON THIS, IT CAN BE CONCLUDED THAT TRANQUILITY HAS TO BE ACHIEVED.

TRANQUILITY MEANS PEACE BY NATURE THROUGH THE NATURE LIKE FUNCTIONALITY, LANDSCAPE, SUSTAINABILITY, AESTHETIC, THIS OVERALL THINGS COMBINING CREATES THINGS A PEACE FOR DESERVE EVERYONE.

WHO/WHOM

IT IS UNDER SUCH AN INITIATIVE THERE SHOULD BE URBAN ART CENTER WHERE ARTISTS OR LOCAL PEOPLE CAN ACCESS THE PLACE TO PERFORM TEACH & EXHIBIT.

WHY

THE AIM IS TO GIVE A PLATFORM TO THE ARTISTS TO SHOW THEIR SKILLS. IT WILL ENCOURGE THE NON-AIDED ARTISTS TO SHOW THEIR TALENT TO THE SURROUNDED CITIES THROUGH THIS CENTER.

ARCHITECTURAL THESIS

WINERY & RESORT AT NANDHI HILLS, BANGALORE

ABSTRACT
REFERENCE OF GRAPES IS FROM 4TH CENTURY IN INDIA. THE FRUIT CONTAINS ABOUT 20% SUGAR IN EASILY DIGESTIBLE FORM BESIDES BEING RICH IN CALCIUM AND PHOSPHORUS. WORLD OVER IT IS GROWN MAINLY FOR WINE MAKING (82% PRODUCTION), RAISIN MAKING (10% PRODUCTION) AND REST FOR TABLE PURPOSE (8%). IN INDIA, HOWEVER IT IS MOSTLY CONSUMED AS FRESH FRUIT AND ONLY A LIMITED QUANTITY IS UTILIZED FOR THE PRODUCTION OF LIQUOR, DRY FRUITS LIKE RAISINS ETC.

INTRODUCTION
THE OLDEST REFERENCE OF WINE GRAPE IN INDIA IS IN 4TH CENTURY. IN SANSKRIT GRAPES ARE CALLED DRAKSHA AND IN VEDIC SCRIPTURES AS MADHUPHA LA (HONEY FILLED FRUIT) AND SWADVI (SWEET). IT IS SAID THAT PORTUGUESE PROMOTED PORT WINE IN GOA AND THAT BECAME THE DOMINANT STYLE FOR OVER A CENTURY.

GLOBALLY OVER 90% OF THE GRAPES GROWN ARE WINE GRAPES. HOWEVER, IN INDIA THE MAJORITY OF THE GRAPES GROWN ARE TABLE GRAPES. WINE GRAPES HAVE THICK SKIN.

SEEDED VARIETIES THAT ARE DEMANDED IN USA AND ITALY MARKETS ARE NOT PRODUCED IN INDIA. TO TAP THIS POTENTIAL, THERE IS A NEED TO INCREASE AREA UNDER SEEDED VARIETIES OF GRAPES. THE WINE TRADE HAS ENORMOUS POTENTIAL. WITH THE SUPPORT OF GOVT. POLICIES, INDIA CAN MAKE A MARK IN WINE INDUSTRY AT GLOBAL LEVEL.

IT IS A LONG TERM VIABILITY OF LAND AND BUISENESS, HELPS IN CONSERVATION OF NATURAL RESOURCES, ENHANCES VALUE OF REAL ESTATE. ALSO IT ENHANCES RELATIONSHIP WITH CONSUMERS, TOURISTS, AND SPECIFIC DEMOGRAPHICS.

- IN INDIA WE HAVE SCOPE FOR DOUBLE CROPPING IN CERTAIN REGIONS AND HARVESTING ROUND THE YEAR IN CERTAIN VARTETIES IS PRACTICALLY FEASIBLE. TECHNOLOGIES TO PRODUCE EXPORT QUALITY GRAPES AND QUALITY RAISINS ARE AVAILABLE. - THIS REPORT FOCUSES ON CONTRAST IN INDUSTRY, AGRICULTURE, WINERY AND VINEYARDS.

CLIMATIC REQUIREMENTS

- IN ITS NATURAL HABITAT, THE CROP BEARS FRUIT DURING THE HOT AND DRY PERIOD AND UNDERGOES DORMANCY DURING THE PERIOD OF SEVERE COLD. IT TOLERATES FROST DURING RESTING STAGE BUT IS VERY SUSCEPTIBLE DURING GROWING PERIOD.
- TEMPERATURE RANGING FROM 15-35 DEG.C IS IDEAL FOR SHOOT GROWTH AND NORMAL PHYSIOLOGICAL PROCESSES OF THE GRAPEVINE. VINES AND FRUITS DO NOT GROW WELL WHEN THE TEMPERATURE FALLS BELOW 10 DEG.C.
- LOCATIONS WHERE THE ANNUAL RAINFALL DOES NOT EXCEED 900 MM ARE IDEAL FOR ITS CULTIVATION.
- MORE THAN THE AMOUNT OF RAINFALL RECEIVED DURING A YEAR, THE NUMBER OF RAINY DAYS IN A YEAR AND THE OCCURRENCE OF RAINS IN RELATION TO THE HUMIDITY ASSOCIATED WITH RAINS DURING FLOWERING AND FRUIT RIPENING IS STAGE OF GROWTH OF THE VINE IS IMPORTANT.
- NOT FAVOURABLE AND INVITES THE ATTACK OF FUNGAL DISEASES.

NEED OF STUDY
-- RESERVATION OF LAND FOR AGRICULTURE.
-- PROTECTING SOIL NUTRIENTS.
-- ENHANCING VALUE OF REAL ESTATE.
-- ENCOURAGING TOURISM.

AIM
-- THE MAIN AIM IS TO DESIGN A CREATIVE AMBIANCE AMID THE VINEYARDS; TO MINIMIZE THE SEPARATION BETWEEN NATURE AND BUILT SPACE AND TO DESIGN TO PROMOTING RURAL TOURISM AND VITICULTURE.
-- THUS, THE PROJECT WILL DEAL WITH THE DESIGN OF A WINERY AND VITICULTURE AREA ALONG WITH PROVISIONS WHICH WILL PROMOTE WINE TOURISM IN INDIA, SPECIFICALLY KARNATAKA.

OBJECTIVES
--THE OBJECTIVE IS TO INCREASE GRAPE CULTIVATION. SO, IT WILL HELP TO PRESERVE NUTRIENTS IN SOIL.
--THE WINE TRADE HAS ENORMOUS POTENTIAL WHICH LEADS IN TAKING WINE --TRADE TO GLOBAL LEVEL WITH THE HELP OF GOVERNMENT POLICIES.
THE OBJECTIVE IS TO ENHANCE VALUE OF REAL ESTATE AND ALSO ENHANCE RELATION BETWEEN CONSUMERS, TOURISTS AND INTERNATIONAL MARKET AND DESIGN A BUILDING STRUCTURE IN LOW-COST MATERIALS WITH A GOOD STRENGTH.

METHODOLOGY

- STUDY OF WINE MAKING PROCESS.
- STUDY FACTORS AFFECTING WINE QUALITY LIKE CLIMATE,

-- WINE GRAPES ARE SMALLER, HAVE VERY THICK SKINS, LOTS OF JUICE AND HAVE NUMEROUS SEEDS PER GRAPE.
-- TABLE GRAPES ARE GROWN TO BE MORE PHYSICALLY EYE-CATCHING, LESS JUICE AND MORE PULP, LESS ACIDITY AND SUGAR WITH THINNER SKINS. SOME TABLE GRAPES DO COME SEEDED WHICH TEND TO BE MORE FLAVORFUL THAN A

ECONOMIC IMPORTANCE
• THE FRUIT CONTAINS ABOUT 20% SUGAR IN EASILY DIGESTIBLE FORM BESIDES BEING RICH IN CALCIUM AND PHOSPHORUS.
• WORLD OVER IT IS GROWN MAINLY FOR WINE MAKING (82% PRODUCTION), RAISIN MAKING (10% PRODUCTION) AND REST FOR TABLE PURPOSE (8%).
IN INDIA, HOWEVER IT IS MOSTLY CONSUMED AS FRESH FRUIT AND ONLY A LIMITED QUANTITY IS UTILIZED FOR THE PRODUCTION OF LIQUOR, DRY FRUITS LIKE RAISINS ETC.

CONCLUSION
VINEYARD RESORT IS A PLACE WHERE PEOPLE CAN ENGAGE THEMSELVES INTO DIFFERENT ACTIVITIES. THROUGH THIS, IT ENABLES US TO FOSTER HEALTH AND WINE RELATIONSHIP IN A PLAYFUL MANNER. THESE HAVE TO CATER TO THE BUSY EXECUTIVE AND AT THE SAME TIME, PROVIDE RELAXED AMBIENCE TO BE DESIGNEE AND ALL THE VARIOUS DESIGN DISCIPLINES COME INTO PLAY.

SOIL:
NANDI HILLS' LIMESTONE ABUNDANT SOIL GIVES OUR WINES THEIR DISTINCTIVE, TERROIR-DRIVEN EARTHINESS WITH DEPTH, RICHNESS AND AROMATIC COMPLEXITY.

BRIEF INTERPRETATION

THE PROJECT OF VINEYARD IS LOCATED IN KARNATAKA. IT IS 50 KM FROM BANGALORE CITY ON THE FOOTHILLS OF NANDI HILLS. THIS REGION IS PREDOMINANTLY AN AGRICULTURE AREA AND THE SOIL CONDITIONS AND WEATHER IS PERFECT FOR GROWING GRAPES. THE DESIGN PROPOSAL CONVERTS AN UNAPPEALING INDUSTRIAL FACILITY TO AN ATTRACTIVE SPOT. THE VARIOUS SITUATIONS ONE CAN EXPERIENCE DURING A STAY IN THE WINERY SHOULD BE WELL DESIGNED, COMFORTABLE AND HOLISTIC. THE FUNCTIONS SHOULD INCLUDE SERVICES FOR TOURISTS (SUCH AS ACCOMMODATION AND VISITORS CENTER) AS WELL AS FUNCTIONS FOR LOCAL SOCIETY (SOCIAL HUB, RESTAURANT, BANQUET HALL AND SHOP) THE DESIGNED SPACES SHOULD BE FLEXIBLE TO ACCOMMODATE VARIOUS EVENTS, ESPECIALLY IN THE PART OF THE PRODUCTION WHICH IS USE FOR 3 MONTHS PER YEAR AND IN THE REST OF THE TIME IS EMPTY.

CLIMATE

TROPICAL CLIMATE
THE TEMPERATURE HERE AVERAGES 22.9 °C. APRIL IS THE WARMEST MONTH OF THE YEAR. THE TEMPERATURE IN APRIL AVERAGES 26.6 °C | 80.0 °F. THE LOWEST AVERAGE TEMPERATURES IN THE YEAR OCCUR IN DECEMBER, WHEN IT IS AROUND 20.1 °C | 68.2 °F.
HUMIDITY:
THE MONTH WITH THE HIGHEST RELATIVE HUMIDITY IS AUGUST (79.24 %).THE MONTH WITH THE LOWEST RELATIVE HUMIDITY IS MARCH (41.49 %).
PRECIPITATION:
THE MONTH WITH THE HIGHEST NUMBER OF RAINY DAYS IS JULY (20.47 DAYS). THE MONTH WITH THE LOWEST NUMBER OF RAINY DAYS IS FEBRUARY (1.33 DAYS).

CONCEPT & ZONING

CONSTRUCTION TECHNIQUES

NATURAL CONSTRUCTION TECHNIQUES SUCH AS

- TRUSSES SYSTEM IS USED FOR THE ROOF CONSTRUCTION.
- WALLS ARE CONSTRUCTED FROM WITH MINIMAL MATERIAL USED BY PROVIDING MAXIMUM OPENING FOR THE OPENNESS AND CONNECTION WITH NATURE.

FORM DEVELOPMENT

FORM OF A BUILDING IS DESIGNED IN SUCH A WAY THAT

- IT RESPONSES CONTEXT
- PROVIDES EASY AND COMFORTABLE ACCESS TO THE VISITORS
- GIVES THE FEELING OF CALMNESS AND SOOTHING
- FEW SPACES LIKE VILLAS ARE DEVELOPED AS PER THE CONTOURS

ZONING ON SITE

VERNACULAR ARCHITECTURE

- A TYPE OF LOCAL OR REGIONAL CONSTRUCTION, USING TRADITIONAL MATERIALS AND RESOURCES FROM THE AREA WHERE THE BUILDING IS LOCATED.
- THIS ARCHITECTURE IS CLOSELY RELATED TO ITS CONTEXT AND IS AWARE OF THE SPECIFIC GEOGRAPHIC FEATURES AND CULTURAL ASPECTS OF ITS SURROUNDINGS, BEING STRONGLY INFLUENCED BY THEM.
- VERNACULAR ARCHITECTURE TENDS TO BE OVERLOOKED IN TRADITIONAL HISTORIES OF DESIGN. IT IS NOT A STYLISTIC DESCRIPTION, MUCH LESS ONE SPECIFIC STYLE, SO IT CANNOT BE SUMMARIZED IN TERMS OF EASY-TO-UNDERSTAND PATTERNS, CHARACTERISTICS, MATERIALS, OR ELEMENTS.

COMFORT

MORE FOCUS IS GIVEN ON THE COMFORT OF PUBLIC BY

- PROVING EASY ACCESS TO THEM FOR ALL THE SPACES
- BY USING NATURAL MATERIAL WHICH COMFORT THEIR MOOD.
- BY ORIENTING BUILDING IN SUCH A WAY THAT IT RESPONSES CLIMATE AND COMFORT THE INTERNAL SPACES.
- BY PROVIDING OUTDOOR SPACES TO ENHANCE VISITORS STATE OF MIND.

SITE SECTION

THE BUILDINGS ARE CONSTRUCTED FROM ALL THE LOCALLY AVAILABLE MATERIAL SUCH AS -

THE DESIGNED STRUCTURE TRIES TO FULFILL ALL THE CLIMATIC RESPONSIVE ELEMENTS

- ORIENTATION, MATERIALS AND CONSTRUCTION-SYSTEM TO RESPONSE CLIMATE.
- STRATEGIES TO RESPONSE CLIMATE, OPENINGS AND OPEN SPACES ARE PROVIDED IN SUCH A WAY TO RESPONSE CLIMATE.

MATERIALS

ECOLOGY AND CLIMATE RESPONSIVE

VINEYARD AND RESORT AT NANDI HILLS, BANGALORE.

VINEYARD AND RESORT AT NANDI HILLS, BANGALORE.

VINEYARD AND RESORT AT NANDI HILLS, BANGALORE.

DETAILS

soil cement block

Manufacturing Process
 1. The soil is prepared by mixing it with stabilizers
 2. Stiff mud is then thrown into this machine.
 3. The machine comes with a pressing lid, operated by two workers throwing their weight on it, so the soil gets adequately compacted, or compacted using a wooden or metal ramrod.
 4. After compacting, the fresh blocks are lifted out of the machine and kept for drying under the sun.
Sizes, availability & pricing
 9"x7"x4 1/2" 9"x7 1/2"x4 1/2" 9"x7 1/2"x4"
 Easily available in Bangalore and Chennai.

Since mud is the most widely distributed resource for building construction, it is useful to explore ways of 'stabilizing mud' without employing energy-intensive techniques like brick burning. Mud in natural state will only last a few rains, but when stabilized with additives, gains the strength required to be a durable building material. **It is the lowest cost material even today with the maximum insulation from heat gains.** Hereby addressing the challenges of both cost and climate.

Composition
 It usually varies based on the quality and strength of soil being used.
Binding agents : cement, lime, cement and lime, lime and pozzolana, bitumen and organic binders.

Soil condition	Soil composition	Stabilizer to be used
More sandy than clayey	Gravel 15% Sand 50% Silt 15% Clay 20%	Cement
More clayey than sandy	Gravel 15% Sand 30% Silt 20% Clay 35%	Lime

Advantages
 • A local material - Ideally, the production is made on the site itself or in the nearby area. Thus, it will save on transportation, fuel, time and money.
 • A bio-degradable material. The strength and durability has been proven since half a century. Energy efficiency and eco friendliness.
 • Cost efficiency - Both in terms of labour and material cost.
 • Uniformity of blocks
 • Fire resistant & Insect resistant
 • Good compressive strength
 • Can be used for load bearing structures.
 • Good Soundproofing and air conditioning

Limitations
 Proper soil identification is required or unavailability of soil.
 Wide spans, high & long buildings are difficult to do.
 Untrained teams produce bad quality products.
 Over-stabilization/Under-stabilization resulting in low quality products.
 Strength largely depends on the process and degree of stabilization.

Hollow clay block

Manufacturing:
 Popular block size for load-bearing walls comes in 6"x8"x16", with size variations in length and width being available. Rate - 85-90/- Rate /sq.ft - 195-220/- in 2019

Lintels:
 There are different types of lintels used as required

Types of Lintels
 1. HCB Arch
 2. Precast Lintel
 3. HCB Chopped Iron
